

Backstabber Diver's Knife

Order Code: MS001 (16cm)
MS001S(10cm)

Professional-grade 'Backstabber' diver's knife for commercial and industrial applications

The Backstabber Diver's Knife is a professional-grade tool used worldwide across commercial, inland, and saturation diving operations.

Manufactured with a marine-grade stainless steel blade for corrosion resistance in saltwater environments, the knife is available in both 16 cm and 10 cm blade lengths to suit operator preference. A rounded tip design improves safety during use in confined or low-visibility conditions.

The Backstabber can be supplied as a standalone knife or with a choice of sheath options. These include a durable webbing sheath or a plastic sheath with optional carabiner and lanyard for secure attachment and ease of access.

Applications: Commercial diving, Inland diving, Saturation diving, Offshore operations, Search and rescue
