

# Camera & Light Pistol Grip

## Technical Specification

Model	CT9012
Dimensions	178 mm × 140 mm × 140 mm
Weight	780g
Materials	Acetal (Delrin®) handle, stainless steel baseplate, aluminium camera mounts
Compatibility	CT3015 Camera, CT4006 LED light

Order Code: CT9012

## Hand-Held Camera and Light Mount

A useful alternative to helmet mounting brackets, the C-Tecnicos hand-held grip provides the diver with increased manoeuvrability and control over camera view and light direction.

The camera and light are secured to mounted 'V' blocks using adjustable stainless steel bands, allowing compatibility with a range of diameters. This enables the diver to position the system into hard-to-reach areas and achieve improved visibility where fixed mounting may be restrictive.

Manufactured from marine-grade stainless steel and hard anodised aluminium, the hand-held grip is a robust yet lightweight accessory suitable for demanding subsea environments.

## Compatible with:

CT3015-TI Camera

CT4006-TI LED Light

**Applications: Commercial Diving, Search and Rescue, Military Diving**
