

Order Code: **400-397 (Helmet Penetrator)**
 400-394 (Microphone)
 400-392 (Earphone Right)
 400-391 (Earphone Left)
 400-374 (Full Comms Set)

Replacement communications components for diving helmets

The Bagpipe communications assembly brings together left and right earphones, a microphone and a helmet communications penetrator for the replacement of existing helmet communications components.

The microphone and earphones support communication between the diver and surface team. The penetrator provides the cable connection through the helmet shell, with a design intended to improve sealing at the helmet mounting interface.

Each component can be ordered individually, allowing worn or damaged parts to be replaced as required. The HC-005 Full Comms Set includes one penetrator, one microphone, one right earphone and one left earphone.

Technical Specification

Model	400-374 (Full Comms Set)
Weight	Penetrator 300 g; microphone 50 g; earphones 100 g each; full set 550 g.
Microphone Impedance	8 Ω
Earphone Impedance	8 Ω
Combined Impedance	2.6 Ω
Microphone / Earphone Connector	M4 eye crimp
Penetrator Cable	4-core, 18 AWG
Penetrator Connector	4-pin male waterproof communications connector

Applications: Commercial diving, Surface-supplied diving
