

Equipment for commercial diver recovery. Select the components and lengths to suit your recovery procedures.

Click a product name or photo for specifications, datasheets and enquiries.

### Diver Recovery Block and Tackle

A 6:1 mechanical advantage pulley system for recovering a diver into a diving bell. The standard extended length is 6 metres, with alternative lengths available on request.

An adjustable cam cleat allows the rope to be locked off during recovery.

**Order Code:**

**HS-050-1/[X]** – Specify required length

### Diver Recovery Spreader Bar

Distributes the recovery load between the two front lifting points of the JOK II recovery harness. The stainless steel bar is marked with a 300 kg safe working load.

**Order Code:**

**11061-LE** – Spreader Bar only

**HS-050-2** – Spreader Bar with Three Carabiners

### Adjustable Rescue Lanyard

Yellow 25 mm webbing lanyard supplied with two stainless steel locking carabiners. Stainless steel slide buckles provide length adjustment from 200 mm to 600 mm.

**Order Code:**

**HA020** – Supplied as a complete assembly.

# Diver Recovery and Safety Equipment

Harnesses, jackets and weights

Adjustable JOK recovery equipment, with identification and inspection records to support traceability.

Click a product name or photo for specifications, datasheets and enquiries.

## JOK Diver Recovery Harness MK II

CE-marked commercial diving recovery harness with distinct profile-cut lifting rings and adjustable shoulder, chest, leg and waist fittings.

Its lifting arrangement has been tested to 9,000 N without failure of the webbing or stitching.

**Order Code:**

**HA014 – Standard**

**HA014-S – Small**

## JOK Diver Recovery Jacket

Combines a recovery harness, bail-out cylinder backpack and quick-release weight system. Six pockets accommodate up to 24 kg of ballast.

Each of its three designated lifting points has been tested to 9,000 N.

**Order Code:**

**HA015 – Standard**

**HA015-S – Small**

## 2 kg Coated Lead Diving Weight

Yellow-coated lead weight with a 50 mm slot for the JOK Jacket's integrated weight system.

**Order Code:**

**MS-019/C-2 – Supplied separately**

## Carabiners & Diver Weak Links

Products are ordered individually. Contact C-Tecnics for selection assistance, availability and quotations.

Click a product name or photo for specifications, datasheets and enquiries.

### Stainless Steel D-Shaped Carabiner

ISC KH200 stainless steel connector with a polished finish, 16 mm gate opening and 35 kN minimum breaking strength. Individually serial numbered.

**Order Code:**  
**HS-026**

### Diver Weak Link

Provides controlled attachment of a working diver to an underwater structure, with separation above approximately 70 kg.

The assembly combines a webbing strap with a stainless steel snap shackle and buckle.

**Order Code:**  
**HS040**
