

Order Code: 12308

Lifting bridle for confined-space rescue and extraction

The SAR Harness Lifting Bridle connects to a compatible over-the-shoulder fall arrest harness to support vertical suspension during rescue and extraction.

A stainless steel inner form is covered with high-grade polyester webbing. The bridle helps maintain an upright position, reducing the risk of snagging or entrapment.

Key Features

- Supports vertical suspension
- Stainless steel inner form
- High-grade polyester webbing
- Steel maillon connectors

Technical Specification

Model	12308
Product Type	Harness lifting bridle
Inner form	Stainless steel
Sling material	Polyester
Maillon material	Steel
Width x height	360 x 450 mm
Weight	1.1 kg
Manufacturer-listed rating	24 kN
Sling standards*	EN 354, EN 566, EN 795
Maillon standards*	EN 362, EN 12275

***Standards listed by SAR for individual components.**

Use with a compatible harness in accordance with the manufacturer's instructions. The 24 kN figure is SAR's listed rating and is not stated as a personnel safe working load.

Applications: Personnel recovery
